Past performance is no guarantee of future results. All investments carry some level of risk. Diversification and other asset allocation techniques do not ensure profit or protect against losses.

Returns for pooled funds (e.g., mutual funds and collective investment trusts) are collected from third parties; they are not generally calculated by NEPC. A "since inception" return reported, begins with the first full month after funding, although actual inception dates (e.g., the middle of a month) and the timing of cash flows are taken into account in composite return calculations.
